EDUCATION

University of Massachusetts Amherst

Expected May 2027

B.S. Informatics, Computer Science minor, GPA: 3.7/4.0

Amherst, MA

- **Coursework:** Data Structures & Algorithms, Software Engineering, Software Design, Database Systems, Web Development, Computer Networks, Mobile Systems, Computer Science Principles, Data Analytics

SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL

Backend: FastAPI, REST APIs, SQLAlchemy, Alembic, JWT authentication, WebSockets

Frontend: React Native, Expo, HTML, CSS

Databases: PostgreSQL, MySQL, Redis, MongoDB, Supabase

DevOps & Tools: Docker, Docker Compose, Nginx, AWS (SES), Linux, Git, pytest, Postman

PROJECTS

Room8 | *FastAPI, PostgreSQL, Docker, Nginx, React Native, TypeScript*

Oct. 2025 – Present

Full-stack developer on a two-person team

- Co-building a roommate coordination app: 12 containerized FastAPI microservices behind an Nginx gateway on a shared PostgreSQL database, with a React Native mobile client
- Built 55+ REST endpoints across the finance, group, calendar, inventory, and shopping list services, and wrote Alembic migrations for schema changes
- Designed the shared-expense ledger: debts tracked per pair and per item, a settle-up flow that nets what two roommates owe each other into one payment, disputes that preserve the original record, and recurring bills
- Built the calendar and chore API, including task completion and a request-and-accept chore swap flow
- Built household membership with join requests and host controls to approve, deny, or remove members
- Wrote 14,000+ lines of TypeScript for the mobile app, including the 7,400-line finance tab (balances, cost splits, spending breakdowns, payment recording), the home dashboard, and group settings
- Researched and guided the Redis setup; wrote the shared Redis client and Redis-backed session tokens
- Helped build the original AWS SES email verification; later built sign-in with emailed codes
- Wrote the AWS hosting guide and production runbook for launch

EXPERIENCE

Lead Mentor Manager

Feb. 2026 – Present

Manning College of Information and Computer Sciences, FIERCE Program

Amherst, MA

- Lead a team of 4 student mentors, running planning meetings and the team's communication workflow
- Plan academic and industry events for 18 students within fixed budget and scheduling constraints

Student Mentor & Event Organizer

Sept. 2023 – May 2024

Manning College of Information and Computer Sciences, FIERCE Program

Amherst, MA

- Mentored 40+ computer science and non-technical students through programming fundamentals
- Organized 3+ trips to conferences and company tours, including MathWorks and Akamai
